SUMMARY

Software Developer with 1 year of experience building end-to-end web applications using React.js, Node.js, HTML5, CSS3, and JavaScript. Skilled in REST API design, responsive UI/UX implementation, agile development, and Git, with a track record of delivering scalable, high-performance solutions across the SDLC.

EXPERIENCE

Full Stack Developer | June 2025 – June 2026

Myinception tech, Chennai

- Developed and deployed full-stack web applications using React.js (frontend) and Node.js (backend) and Express.js.
- Designed and integrated RESTful APIs to connect client and server layers.
- Built responsive, cross-device UI components using HTML5 and CSS3.
- Contributed to database integration, code reviews, and agile sprint delivery within a collaborative team.

PROJECTS

Wrightpath - E-learning platform | July 2025 – December 2025

- Built a full-stack web application using React.js (frontend) and Node.js (backend).
- Developed scalable RESTful APIs and implemented responsive UI components.
- Integrated Google Cloud Platform (GCP) for deployment and data management.
- Delivered end-to-end features in an agile environment.

Edmentum | December 2025 – June 2026

Contract-based project with Integra E-Publishing focused on an e-learning platform.

- Developed responsive, cross-device web interfaces using HTML5 and CSS3.
- Ensured consistent UI standards and optimised layouts across screen sizes to improve user experience.

Visitor Pass Management System | July 2026 – Aug 2026

- Built a full-stack MERN application with role-based access for Admin, Receptionist, and Employee.
- Implemented the complete visitor workflow, including registration, approval, check-in/check-out, and audit history.
- Enforced business rules and data validations server-side using Express middleware and controllers.
- Secured endpoints with JWT authentication, bcrypt password hashing, and role-based authorization.
